

### DTP 340 M WORKFLOW AND SPECIFICATIONS AT A GLANCE

#### DTP 340 M Technical Data

Length, width, height 36 cm, 49 cm, 25 cm [14", 2",10"]

40 kg [88 lbs.] Weight

Up to 20,000 sheets/hour [70/80 g/m²/20 # stock] **Punching capacity** 

Punching width up to 34 cm [13,5"] Formats

**Punched thickness** 35 sheets\* per punching operation [depends on tool]

For all tools

Punching pins can be Punching pins can be deselected for fastest deselected

possible change of format

Tool change In less than 1 minute

**Punch alignment** Vertical

Variable margin clearance

230 V, 50 Hz/250 W or 110 V, 60 Hz **Power supply** 

### MBS MODULAR BINDING SYSTEM WBS 340, CBS 340, CCS 340 and PBS 340 Technical Data

# **DTP 340 M → → • • • • •** Replaceable tools Binding machine Punching and binding system DTP 340 M with MBS module

Modular Punching and Binding System PUNCHING SYSTEM for punching and perforating paper with operating width of up to 34 cm [13,5"]. Convenient operation thanks to foot switch and vertical paper feed. Versatile thanks to replaceable tools.

Simpler, faster tool changes in less than 1 minute, thanks to guick-release fastener.

## Setting the margin clearance

Rotary knob used to set the ideal perforating margin clearance [not in the case of tools with thumbhole].

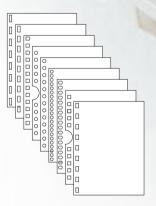

## Chad compartment

Large chad compartment can be removed from the front or the side.

TO ALLOW OPTIMUM FORMAT ADJUSTMENT, all perforating tools are delivered with punching pins which can be deselected [in case of spiral binding, punching pins can only be deselected for A4 [11"] and A5 [8,5"] formats].

Replaceable punching tools for all loose-leaf binding systems

Paper to be

punched

Type of perforation	Stamp size	Pitch	Max. punchi thickness
RENZ RING WIRE®	Ø 4,0 mm	3:1	3,0 mm
Round hole	Ø 4,0 mm thumbhole	3:1	3,0 mm
	Ø 6,0 mm	2:1	3,0 mm
RENZ RING WIRE®	4 x 4 mm	3:1	3,0 mm
Rectangular hole	4 x 4 mm thumbhole	3:1	2,5 mm
The state of the s	5,5 x 3,5 mm	2:1	3,5 mm
	6 x 6 mm	2:1	3,0 mm
RENZ PLASTIC BINDING	7 x 3 mm	Europe 12 mm	3,5 mm
Rectangular hole	8 x 3 mm	US 9/16"= 14,28 mm	3,5 mm
RENZ spiral binding	Ø 3,6 mm	5 mm	2,5 mm
Round hole	Ø 4,0 mm	6 mm	2,5 mm
RENZ spiral binding	4 x 3,2 mm	5 mm	2,5 mm
Oval hole	4,5 x 3,6 mm	6 mm	2,5 mm

MBS - MODULAR EXPANDABLE PUNCHING

AND BINDING SYSTEM for Renz Ring Wire wire comb binding, spiral binding and plastic binding. All MBS modules can be attached to the DTP 340 M in order to produce a highperformance, compact punching and binding system or can be used on their own as a binding machine.

WBS 340 Manual closing machine

For closing RENZ RING WIRE® elements, Ø 3/16" to 1 1/2" [5.5-38 mm], non-pitch dependent, max. operating width 340 mm [13,5"], can also be used as a standalone device\*

CBS 340 electric spiral binding machine

For electrical spiral binding of plastic and wire spirals up to Ø 20 mm, can also be used as a standalone device\*.

CCS 340 manual spiral cutting and bending machine

For cutting and bending plastic spirals up to 20 mm, max. operating width 340 mm [13,5"], can also be used as standalone device\* The affordable alternative to the CCS 340 is the SC cutting and

bending pliers for plastic and wire

PBS 340 manual binding machine for

plastic binding Manual binding machine for binding plastic binding spines from Ø 6 to 52 mm [1/4"-2"], operating width 340 mm [13,5"], can also be used as standalone device\*, for US pitch 24 rings max., for European pitch, 28 rings max.

spirals.

MODULAR ASSEMBLY thanks to a simple attachment system, all MBS modules can be attached to the DTP 340 M in just seconds to produce an extremely compact punching and binding system.

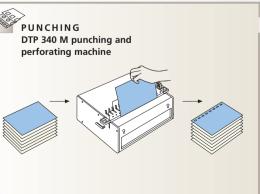

\* MODULE HOLDER All modules can also be used as standalone devices - this requires a module holder.

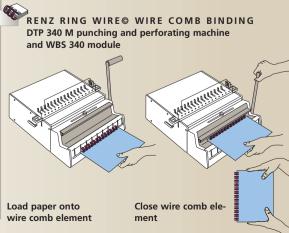

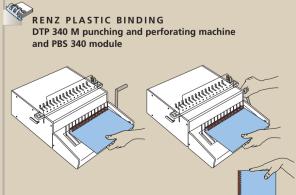

ECL 360 For professional closing of RENZ RING WIRE® wire comb binding we also recommend our ECL 360 electric closing machine.
